Dear Mr. Mierzejewski, 5/18/82

Sorry about the delay in responding. I've been tied up on a long affidavit in the suit for the Dallas and NewOrleans field office records.

What you sent on Spitz and the car are interesting. Thanks.

On the spectro suit, back to the court of appeals. I did get more information, but they are still holding back all that is significant that they have. I put it this way because I do not really know what they tested, only what they've disclosed testing.

I do not plan further writing about the spectrographic or NAA examinations, unless there is still another remand and it produces significant information. I do plan other writing when I can.

By now you know about the NAS report.

Thanks and best wishes,
